Introduction

Information security is a holistic discipline, meaning that its application, or lack thereof, affects all facets or organization or enterprise. The goal of the Alvernia **Unformation** Security Program is to protect the Confidentiality, Integrity, and Availability of the data employed within the organization while providing value we conduct business. Protection of the Confidentiality, Integrity, and Availability are basic principles of information security, and can be defined as:

ConfidentialityEnsuring that information is accessible only to those entities that are authorized to ha many times enforced by the classic need to know principle.

Integrity Protecting the accuracy and completeness of information and the methods that are used to and manage it.

Availability Ensuring that information assets (information, systems, facilities, networks, and computer accessible and usable when needed by an authorized entity.

Alvernia University as recognized that out interest information is a critical asset and as such our ability to manage control, and protect this asset will have a direct and significant impact on our future success.

This document establishes the framework from which the enterprise can efficiently and effectively manage protect its business information assets and those information assets entrusted to Alwerniatable partners, customers and other third parties.

The Alvernia University formation Security Programuilt around the information contained within this policy and supporting documents
